Addendum No. 1 Clarifications

The following responses to the questions are to be incorporated into the Contract Documents for the Pine Hill Access Road & Campus Improvements Project.

1. Sheet 19 has a note that reads “CEMENT CONCRETE FOREBAY SEE DETAIL 9 ON SHEET 20”. I believe this is referring to detail 36 on page 32. However, this detail shows modified rockfill, not cement concrete. Please advise.
   
   *The Cement Concrete Pavement shown on Sheet 28 of 33 is to be used to construct the cement concrete forebay. Detail 36 on Sheet 32 is for the forebay spillway.*

2. The specifications have a section for 815.13 – FLASHING BEACON SCHOOL ZONE SIGN. Please confirm that the work associated with this is paid under ITEM 6: LIGHTING.
   
   *The work associated with Item 815.13 will be paid for under Item 8: Pavement Markings and Signs as shown on page SP-5 of the Bid Documents.*

3. Under the lump sum bid item description for ITEM 9: MISCELLANEOUS SITE WORK, item 670.2 is referenced. This is not a standard MassDOT item. Please provide a description and a special provision for this work.
   
   *Under Item 9 on page SP-5 of the Bid Documents, delete Item 670.2 and add Item 672. Fence Gate and Posts Removed and Reset.*

4. Does this contract include HMA/Fuel escalation per MassDOT standards?
   
   *Price adjustments shall be as shown on pages 60, 61 and 62 of the Bid Documents.*

5. I wanted to check and see if there were official bid forms that needed to be requested.
   
   *There are no separate bid forms. The bid forms located in Appendix C of the Bid Documents are to be completed for bidding.*
