C-1 Rare and Endangered Plant Species in Sherborn
C-2 Rare and Endangered Animal Species in Sherborn
SECTION ONE
PLAN SUMMARY
Plan Summary

Documenting the community’s desire to preserve the rural character of Sherborn – its small town qualities, its many scenic roads, the abundance of open space and opportunities for hiking, horseback riding or cross-country skiing on its many trails – is the primary aim of this Open Space and Recreation Plan. Sherborn’s character is what makes the town an enjoyable place for its residents to live and raise families.

Sherborn has retained its rural character principally because lands have been acquired as protected open space and because the difficulty of establishing septic systems in Sherborn’s soils (e.g., high groundwater, bedrock, wetland, dense soils) has tended to slow growth.

Approximately thirty percent of Sherborn’s total area is currently undeveloped but developable under current zoning, assuming compliance with state and local septic and wetland regulations. This percentage includes lands temporarily protected by Chapter 61 programs. Section 8 of this report presents three broad goals that represent residents’ expressed concerns and priorities for protecting Sherborn’s resources, along with sixteen objectives formed to guide achievement of these goals. It also proposes a vision for Sherborn’s open space in which existing open space is connected, forming bands that follow the northwest-to-southeast trend of Sherborn’s valleys and ridges. Bands of open space alternate with bands of existing or future residential development.

Bringing about such a vision requires that Sherborn take creative, pro-active steps. Recommended actions include adopting the Community Preservation Act, acquiring and protecting additional open space, actively encouraging landowners to place conservation restrictions on their properties, and involving as many residents as possible in Sherborn’s planning process by scheduling discussions and workshops.
B. Statement of Open Space and Recreation Goals

In reviewing the goals identified by participants at the Open Space and Recreation Plan workshops and forum, a vision of Sherborn emerged. Residents place high importance on the rural character and natural resources of their town. They see preservation of open space as a key to maintaining those values. The following broad and general goals reflect this vision.

- Preserve Sherborn’s natural resources.
- Preserve Sherborn’s rural character.
- Maintain scenic views enjoyed from public areas and roads.
- Continue to build and maintain greenbelts and trail systems.
- Enhance active and passive recreation opportunities available to residents of all ages and interests.
- Create a pedestrian-friendly town center.

Residents hope to see dedicated involvement on the part of town boards, organizations, schools and individual citizens to use all tools available to retain the character of their home town.

Sherborn will inevitably experience change throughout its future and that change should be in a desirable direction. Detailed planning can help accomplish this.
SECTION EIGHT
GOALS AND OBJECTIVES
Goals and Objectives

Goals and objectives have been derived from the 1996 Open Space and Recreation Plan, the 2001 General Plan, public workshops and forums, input from town boards, and analysis conducted by the Conway School of Landscape Design Team.

The following list presents open space goals along with their more specific objectives. The numerical sequence of these goals is not intended to be a rank order but is included for cross-reference use. The actions to achieve these goals and objectives are listed in Sherborn's Five-year Action Plan (Section 9).

Recognizing the community’s desire to protect and acquire land for resource protection, preservation of rural character, and recreational opportunities and providing ways to reach these goals, is the overall objective of this Open Space and Recreation Plan.

1. Protect Sherborn’s Natural Resources
   1-A. Protect groundwater quality and quantity to ensure a safe drinking water supply
   1-B. Preserve, extend and create wildlife corridors
   1-C. Protect habitat diversity for wildlife, especially for endangered species

2. Preserve Sherborn’s Rural Character
   2-A. Preserve scenic areas and views
   2-B. Preserve Sherborn's historically agricultural heritage
   2-C. Promote active farms and backyard agriculture
   2-D. Encourage an attractive, pedestrian-friendly town center
   2-E. Discourage sprawling suburban development patterns

3. Enhance Recreational Opportunities, Passive and Active
   3-A. Improve town walkability
   3-B. Improve knowledge of passive recreational resources
   3-C. Acquire easements to trails on private land
   3-D. Extend and create new trails and trail links
   3-E. Expand active recreation fields
   3-F. Create a management and maintenance plan to improve recreation lands
   3-G. Improve handicap accessibility to public facilities
SECTION NINE
FIVE-YEAR ACTION PLAN
Proposed Action Plan

Corridors of open space run north-south through Sherborn, following the natural river ways and form of the land. These corridors provide habitat and permit movement for wildlife, as well as providing various opportunities for human recreation.

Critical areas of concern are unprotected resources including rare and endangered species habitat, Aquifer protection zones, and scenic areas. Along with these specific areas, the whole town of Sherborn should be treated as an aquifer recharge area and protected accordingly.

Potential trail links have been identified by Sherborn residents and assessed by the Conway School of Landscape Design Team. These links generally run east-west, connecting to areas throughout the larger identified corridors.

Open Space and Recreation Plan Update 2006 Sherborn, MA

Prepared By:
Ian Hodgdon
Hannah Whipple
Conway School of Landscape Design
A. Vision For Sherborn

The Action Plan depicts a vision for the open space of Sherborn. A vision plan represents a statement of a desired future that can guide and direct dedicated people to carry out the many tasks necessary to bring about their goals.

Proposed corridors of protected open space run north-south through Sherborn, following the natural river ways and the form of the land. These corridors provide habitat and permit movement for wildlife; they also provide various opportunities for human recreation. Potential trail links generally run east-west, connecting to areas throughout the larger identified corridors.

Critical areas of concern have been identified for protection through an extensive analysis of Sherborn’s resources. Maps of these analyses can be found in Appendix E.
B. Five-Year Action Plan

This Five-Year Action Plan identifies specific tasks for accomplishing each objective in order to reach the Open Space and Recreation goals of Sherborn. Also included is a schedule for completing each task and the groups recommended for implementing them. All of the following goals, objectives, and actions are subject to funding and appropriation.

Key to Groups responsible for implementing action items

AHRC  Ad-Hoc Road Committee
BOH   Board of Health
BOS   Board of Selectmen
CC    Conservation Commission
CMD   Community Maintenance and Development
FPAC  Farm Pond Advisory Committee
GPC   Ground Water Protection Committee
HC    Historical Commission
HDC   Historic District Commission
LAC   Land Acquisition Committee
OSC   Open Space Committee
PB    Planning Board
RC    Recreation Committee
SF    Sherborn Farmers
SFTA  Sherborn Forest and Trail Association
SL    Sustainable Lifestyles
SRLF  Sherborn Rural Land Foundation
TFC   Town Forest Committee
TR    Town Residents
TW    Tree Warden
WAC   Western Avenue Committee
ZBA   Zoning Board of Appeals

| 1-A. Protect groundwater quality and quantity to ensure a safe drinking water supply | 1. Enact bylaws and regulations to protect groundwater.  
2. Support Sherborn’s more appropriate than Title 5 septic regulations.  
3. Acquire and protect open space in sensitive aquifer recharge areas.  
4. Continue to explore regulatory and other methods of minimizing chemical and pesticide use on both public and private land.  
5. Continue to educate residents about groundwater protection and the importance of regular testing of well water.  
6. Monitor activities along town borders impacting groundwater.  
7. Support regional water protection by working with the Southwest Area Planning (SWAP) sub-region.  
8. Monitor adherence to groundwater protection legislation and regulations proposed by the state.  
9. Protect Farm Pond and reacquire water rights.  
   a. Review and implement control mechanisms to minimize chemical, pesticide, herbicide, and fertilizer use in areas immediately surrounding Farm Pond.  
   b. Educate residents regarding proper protection of the Farm Pond watershed. | | PB, GPC, BOH |

Prioritized Land Acquisition or Protection Guidelines

1. Land important to protecting groundwater quality and quantity.

2. Land connecting existing protected open space.

3. Land that preserves or extends the trail system in Sherborn and to neighboring towns.

4. Land that preserves scenic areas and views.

5. Land with active or passive recreation potential.

6. Destination points.

7. Land that will improve the design of downtown.

8. Land needed to increase the pedestrian friendliness of downtown or to improve traffic patterns.

9. Land that contributes to Sherborn's rural atmosphere, including farmland.

10. Land that preserves wildlife and plant habitat diversity.
